alles klar GmbH – Experience in the field of Decentralized Wastewater Treatment

Microstation KLÄRCHEN®

› Application area: from 6 up to 24 inhabitants average load
› Combination of septic tank & biofiltration (Filter material: hydrophilic Rockwool)
› No power consumption, as natural ventilation via chimney effect and biofiltration in free gradient
› Very low-maintenance, since no electromechanical parts are installed
› Excellent cleaning performance even under extreme load fluctuations and weather conditions

Microstation FLUIDIFIX®

› Application area: from 6 up to > 500 inhabitants (P.E.) average load
› Combination of septic tank & fluidized bed (Biofilm) technology
› Plug & Play package plant
› Secured High Performance (under low, nominal and variable pollution loadings)
› Designed and built according to the highest European and German Standards (CE Certification EN 12566-3)
› Modular multi-tanks layout (25-year life tank)
